

Initial Training in Responsible Conduct of Human Subjects Research

It is the policy of Mercy Health St. Vincent Medical Center and Mercy Health Children’s Hospital that:

Investigators involved in any human subject research must complete initial training and subsequent continuing education/training before the IRB will approve or re-approve a study.

I have completed all education/training as required by Mercy Health – North LLC, ROE-005 Policy titled "Training in Responsible Conduct of Human Subject Research" including the appropriate CITI Program *Basic Course*. In addition, I have reviewed all Mercy Health – North LLC Research Oversight and Education (ROE) policies and procedures.
