Health Records Requirements

VARICELLA (Chickenpox)

Documentation Information:

One of the following is required:

- Dates of two doses of Varicella vaccine given at least 28 days apart, OR
- Lab report showing IgG antibody titer/blood test results for Varicella (student’s results must be clearly marked as immune or not immune/equivocal).
  - If lab results show positive IgG antibody (immunity) for Varicella, documentation is complete.
  - If lab results show non-immune or equivocal results (immunity cannot be determined), student will be prompted by CastleBranch to have two additional vaccinations spaced at least 28 days apart (no additional titer will be required). Student will be considered “in-process” as long as student remains current in the series.

Documentation of prior diagnosis of Varicella/Chickenpox does NOT provide proof of immunity and is NOT acceptable.

Upload to CastleBranch account:

- Dates of two doses of Varicella vaccine given at least 28 days apart
- Lab report showing IgG antibody titer results
  - If the IgG antibody titer result is positive/immune, documentation is complete.
  - If the antibody titer result shows non-immune or equivocal, student will be prompted to have two additional Varicella vaccinations spaced at least 28 days apart (series must be started before the clinical assignment begins and student must remain current in the series in order to be considered compliant for clinicals; no other titer is required).

Office: Compliance and Risk Management
Date: 6/5/17
Information: for all clinical students
